

R2i Virtual Exchange

NOVEMBER 18TH, 2020
11:00am-1:00pm
VIRTUAL - ZOOM

Year Founded:	2015
Website:	www.htbioimaging.com
Revenue (Est.):	<\$500K
Employees:	10
US Office:	CA

BUSINESS OVERVIEW:

Revolutionary patented medical imaging platform technology to detect and classify cancer early on the spot. HT BiImaging developed the HTScan – a disruptive system to measure heat diffusion in biological tissues, translating it into an image to enable early detection of cancer in a non-invasive and real-time procedure at the point of care. The HT BiImaging system creates a new medical imaging modality that will be used in every community clinic and OR.

KEY HIGHLIGHTS:

- Founding team has track record of over 10 exits
- UC Davis team, led by Michael Kent, has begun a pilot study, clinical trials in the US and Israel Show 92% Accuracy For Oral Cancer Detection

CONFERENCE OBJECTIVES & CLINICAL FOCUS:

- Investment
- Channel Partners & Pilot customers
- Research/validation partners in Oncology, Radiology, and Dental

Shani Toledano,
CEO

Gideon Barak,
Chairman

Prof. Michael Glick,
UB—School of Dental Medicine,
Advisory Board Member
