BUSINESS OVERVIEW:

NovaSight assesses and treats early vision disorders using advanced eye-tracking and AI technology. Aiming to prevent pediatric vision loss, our products are specially designed for the unique needs and attention spans of children. The CureSight™ is a lazy eye treatment, intended to replace traditional eye patching therapy, all while the children watch their favorite content at home. The EyeSwift® system is a comprehensive portable vision assessment device, which accurately and objectively screens for multiple vision impairments within seconds.
